NEW PRODUCT

MAGE VENT

MAGE Vent

Hip and ridge ventilation roll made of continuously corrugated aluminium with PUR-colour coating and adhesive strips.

Base material: aluminium, coloured, profiled Length: 5 m width: 320 mm Colours: red, brown, black, maroon and oxid red

Advantages:
Effective water proofing
Green building technology
Fast installation with dry and neat finishing
Flexible, durable and colour permanence
Aesthetic value using German Technology

MAGE SEAL - PLUS

MAGE Seal - Plus

Wall and chimney flashing tape MAGE Seal-Plus corrugated and F3 made of aluminium with PUR-colour coating and butyl adhesive strips.

Base material: aluminium, coloured, corrugated Length: 5 m width: 300 mm Colours: red, brown, black and oxid red

Advantages:

Effective water proofing
Fast installation with dry and neat finishing
Flexible, durable and colour permanence
Aesthetic value using German Technology

PRODUCT INFORMATION

Full metal product

- highly durable and weather resistant
- high form- and function resistance
- fully recyclable

General corrugation

- usable on hip, ridge and wall flashing
- up to a stretching factor of 20%
- perfect mould ability on tile surface
- perfectly suitable for hip applications

Predetermined bending lines

- easy to bend on hip, ridge and walls
- ideal centering of the tape

High quality colour coating

- durable UV-resistance
- available in several colours

Butyl adhesive strips

- fastening and sealing on the tile surface
- additional rain protection

PRODUCT INFORMATION AND APPLICATION STEPS

General information

On a pantile roof you have to apply the MAGE Seal roll with minimum 2 inch (5 cm) overlap. The tiles and wall surfaces have to be dry and clean and the application temperature should be minimum +42°F (+5°C).

FLASHING APPLICATION

Step 0

- cut the length
- bend off the height of the flashing
- apply on the tile hill

Step @

- raise up the supernatant on both sides
- remove the protective foil from the upper adhesive strip
- horizontal fixation

Step 6

- additional protection with MAGE Flex final strip
- fastening with plumber screws and dowels

Step 0

 sealing of the upper seam with MAGE sealing compound

MAGE Seal - Plus Set

- for wall flashing

HIP AND RIDGE APPLICATION

Step 0

- place the roll well centred on the roof batten
- fix it with staplers or roofing nails on the ridge batten

Step 0

- bend the roll at the predetermined lines
- press it like a bonnet on the tile surface
- for hip installation, work from the roof ridge to the eaves

- please remove the protection foil from the butyl adhesive strip

- press the roll step by step on the tile surface
- the corrugation has to be stretched downwards from the top of the tile to the tile valley
- thoroughly press down the edge region

- cut the remainders with a knife or plate scissors
