Pcs / m ²	10.2 pcs	Packing / plt	50 ctns or 400pcs

Test Result

Test Method : GB/T21149-2007

Test Result : Fulfill superior quality requirements

Product Warranty : 10 years

Surface Quality

No.	Specification	Technical Requirements	Result
1	Perforated crack (mm)	not allowed	complied
2	Crazing resistance	not allowed	complied

Physical Properties

No.	Specification	Technical Requirements	Result
1	Transverse Breaking Strength (Dry)	≥1600	average : 3404
2	Resistance to Freeze/Thaw Cycling	15 times cycling	complied
3	Thermal Shock Resistance	10 times cycling	complied
4	Water Absorption (%)	≤6.0	average : 2.0
5	Permeability	Pass	Pass

New Style For Living

Company Introduction

Butterfly roof tile is a large and modern roof tiles manufacturer and supplier in Asia with an annual capacity of over 12,000,000 square meters. Established in late 1970's, it has over thirty one years of history in roof tiles manufacturing. The company has brought workflow automation into reality through its fully automatic roller kilns and advanced technology imported from Italy.

Our products are available in a variety of colours. The roof tiles have fading resist, anti-cracked feature and water resistance. Its natural, mild lusterless glazed tiles are the preferred roof materials for high-grade apartments, residences and villas.

Butterfly roof tile attaches importance to scientific research and technical development satisfy user's demands. The company has also obtained the certification under ISO9001 :2000 International Quality Control System.

Butterfly roof tiles are reputed locally and abroad, including Asia, Europe and US. Its dynamic marketing and operations system have also enabled the company to enjoy rapid growth.

Butterfly roof tiles complemented by top quality and supported by innovative technologies brings stylish looks to your home.
